

Leadership for Reliability Excellence

Motivated people and reliable processes build the foundation for transformational improvement initiatives. Reliability Excellence, a methodology characterized by production-led reliability, a proactive culture, metrics-based performance and continuous improvement, provides the framework to maximize results from new initiatives and build a culture striving towards Operational Excellence. Managers and leaders inherit the challenge to build the bridge between Reliability Excellence and Operational Excellence.

In this online course, get the insider's tools to close the gap between implementation actions and results. You will learn how to maximize the return on your investments by applying proven principles that make transformational improvement initiatives successful.

This online course is more than a case study of success. It is an experiential class that includes group exercises, take-home tools and job aids for you to put in action at your site.

Learn How To

Define the principles of Reliability Excellence

Explain how Reliability Excellence is the foundation of Operational Excellence

Recognize the current state of reliability across all functions

Identify the value of reliability improvements

Who Should Attend

Leadership for Reliability Excellence is ideal for managers engaged in process improvement initiatives such as Lean, TPM and Six Sigma. Suggestions include General Managers, Plant Managers, Corporate Reliability Managers, Maintenance Managers, Operations Managers, Maintenance and Operations professionals.

Life Cycle Institute

Think it's impossible to have an interactive, effective online course that produces results? Think again. It is possible to meet your training needs in a Life Cycle Institute online course. Be prepared for an active online environment. Our live, web-based courses are highly interactive and combine the elements of social, facilitated and self-directed learning to maximize online training effectiveness. Our courses are designed to teach by doing, and include tools and practical guides to help you implement learning on the job.

- Facilitators who are practitioners and experts in learning transfer
- Participant-centered learning design and online engagement tools – minimal lecture and maximum practice
- Facilitated, social and self-directed learning activities
- Flexible classes so any technical skill level can achieve maximum engagement and knowledge retention
